

Environmental Policy Statement

ERP Security Ltd is dedicated to implementing environmentally responsible policies and practices. We continuously evaluate our performance and identify opportunities for improvement to maintain high standards of environmental stewardship.

Our commitment to environmental protection includes the following actions:

- Striving to uphold the highest possible environmental standards across all operations.
- Promoting the efficient use of materials, supplies, and energy while prioritising renewable and recycled resources.
- Staying informed of industry best practices and adopting them where applicable.
- Minimising waste generation throughout all business activities.
- Encouraging third parties associated with our business to adhere to similar environmental standards.
- Actively involving employees in environmental sustainability initiatives.
- Regularly assessing and mitigating the environmental impact of our operations.
- Effectively communicating our environmental policy to employees, customers, and stakeholders.
- Complying with all relevant legal requirements and other obligations related to our environmental aspects.
- Continuously improving our environmental practices and preventing pollution.

At ERP Security Ltd, every employee shares responsibility for protecting the environment. We expect all team members to adopt a proactive approach and demonstrate their commitment to achieving the Company's environmental objectives.
